FULL STACK DEVELOPER

Full-stack developer with **6 years of hands-on programming experience**, specializing in **JavaScript** and **TypeScript** development. Experienced in building full-stack web applications, REST APIs, and backend services using **React**, **Next.js**, **Node.js**, **Express.js**, and **Fastify**. Proficient with **PostgreSQL**, **MongoDB**, and **Redis**, as well as database tooling and ORMs such as **Drizzle**. Experienced with modern web development practices, API design, and server-side templating with **EJS**, with a strong understanding of web application architecture and development.

TECHNICAL SKILLS

Languages	: TypeScript, JavaScript, HTML, CSS
Frontend	: React, Next.js, Zustand, Three.js
UI libraries	: ShadCN, ChakraUI, AntD, Bootstrap, Radix Ui
Backend	: Node.js, Express.js, Fastify, REST APIs, EJS
Databases	: PostgreSQL, MongoDB, Redis
Database tools	: Drizzle ORM, Mongoose, MongoDB compass, pgAdmin
DevOps	: Docker, Linux, Nginx, Caddy, PM2
Deployment	: VPS, Railway, Vercel, Netlify, Cloudflare
Tools	: Git, GitHub, VsCode, Postman, Hoppscotch, Figma

EDUCATION

Lyceum International School
G.C.E A/L Combined Maths, Physics, ICT

Wattala, Sri Lanka
August 2026(Pending Results)

PROJECTS

<u>CurioPost</u>	<i>Social media platform built using React, Javascript, Node, Express, MongoDB</i>	Source Code
- developed the entire platform from scratch. It was a social media platform where you could post pictures, videos, ask questions, and more. - Built the system using Reactjs, ExpressJS, and MongoDB. And also used UI framework bootstrap to build the UI, and also make sure it is responsive and works in different devices. - Also used with cloudinary to store images of posts, videos, and user avatars. - Also created an algorithm to give users a custom for you page based on their interests.		
<u>NoteHub</u>	<i>Note management platform built using react, and express with mongodb</i>	Visit
- NoteHub is a note management platform, that lets you save notes on the cloud, and also has features like invite users to collaborate, version control, public search and list of notes, and more. - Built entirely Using express, jsonwebtoken, React, quilljs, mongodb		
<u>PartLens</u>	<i>Interactive 3D Technical Documentation System. Built using Nextjs, express, postgres, redis</i>	Visit
- PartLens is a Interactive 3D Technical Documentation System under development, which lets you upload 3D CAD .glb files of machine diagram and alongside it upload the manual files with .PDF. It then lets users view that machine search for instruction manuals of that machine, and click parts in the 3D diagram and filter files for that particular part only. - Building using typescript, nextjs, express, postgres with drizzle, and redis - See here for full list of features and functions
